

Civil/Environmental Engineer: AH Environmental Consultants is seeking engineers to provide professional environmental engineering services to municipal and federal clients. Requirements:

- a minimum of 4 years of consulting experience
- excellent communication skills
- Candidates with a professional license are highly preferred

We expect applicants to be flexible in both type and location of assignments. Representative duties include

- performing water, wastewater and storm water studies (including desktop modeling)
- site investigations
- preparing civil designs and compliance documents (e.g., permit applications, Storm Water Pollution Prevention Plans)

The vast majority of deliverables are either reports or management plans. Fax resume to (757)873-4952 or send email to jobs@ahenv.com.
