

AH Environmental Consultants is seeking a highly motivated and experienced Wastewater Engineer to join our Newport News, VA; Tyson Corner, VA; or Wilmington, NC office.

Candidates must have strong technical expertise, specifically in the treatment of domestic wastewater and be fully capable of providing technical leadership and direction to project teams. Candidate must possess excellent organizational, communication and technical writing skills.

Project types include:

- Wastewater characterization
- Industrial wastewater pretreatment evaluation, design and permitting
- Process evaluations and optimization
- WWTP process troubleshooting
- Design (process design, pilot scale studies, selection, sizing, placement of equipment);
- Wastewater treatment process modeling;
- Other projects such as collection system improvements, infiltration and inflow removal, and master planning.

Requirements include:

- B.S. in Civil, Environmental, or Chemical Engineering (MS preferred)
- At least 10 years of experience in wastewater treatment for a consulting firm
- Excellent communication skills
- Professional Engineering registration is strongly preferred

This position offers significant room for growth and development for the right candidate.
